

Consistent cleaning with improved sanitation capabilities

The Tote/Pan Washer is constructed of non-insulated 316 Stainless Steel. The washer is equipped with three zones: pre-wash, wash (using soaps) and sanitation. Included is a loading and accumulation zone. The tote/pan washer is designed and manufactured for ease of maintenance and cleaning.

FEATURES:

- **Ergonomically designed** and manufactured for operator safety
- **Square tube frame construction** with side doors for easy access
- **Heating system** integrated with the unit (stream or electric)
- **Adjustable hold-down top rail system** helps pans hold their positions (optional)
- **Temperature probes** located in both detergent and sanitation zones
- Detergent regulated by a peristaltic pump system and alkaline probe system
- Sanitation additive regulated by a peristaltic pump system
- **Filter system integrated** in the machine to remove larger particulates from piping system
- **Recycled pre-wash and soap/detergent zone.** Final rinse/sanitation is run through fresh water supply.

MANUFACTURING STANDARDS

Certified by the Canadian Welding Bureau to Welding Standards CSA W.47.1 and CSA W.47.2.M

ABCO maintains a strict quality assurance system

ABCO acquires project related code certifications as required

Custom designed to meet your tray sizes and capacity requirements.
