

RECYCLING & COMPOSTING

Systems are specifically designed to operate efficiently in the harsh environment of the recycling and sorting process.

ABCO systems are custom designed to suit your requirements, providing best solutions for **low to high volume recycling and composting applications.**

Cost-effective solutions for complete systems or individual components:

- conveyors
- hoppers
- sorting stations
- mixers
- platforms
- bins

All components are rugged, easy to maintain and designed for maximum operator efficiency and safety. ABCO helps you **manage waste, support sustainability** and **increase productivity** while reducing costs.

ABCO aims to consistently meet customer requirements and continually improve our process. Custom designed systems and individual components are manufactured to ABCO's **rigid quality standards:**

- Maintaining a quality system compliant with ISO 9001:2000
- Our facility is certified by the Canadian Welding Bureau to CSA Standards 47.1 and 47.2
- Acquiring project related code certifications as required
